

Pentacam®

Anterior segment tomography

The Pentacam® provides you with an overall view of the anterior eye segment in a matter of seconds. It delivers tomographic data on elevation, curvature and pachymetry of the entire cornea. Auto release accompanied by a quality test guarantee fast, reproducible and delegable measurements. The Pentacam® can be expanded individually to include optional software modules.

70700 Pentacam® incl. standard software

Pentacam® HR

Anterior segment tomography with high-res Scheimpflug images

The high-resolution Pentacam® HR, equipped with a brighter, optimized lens system for brilliant image quality. The Pentacam® HR comes with a standard software package, which can be expanded as desired with optional software modules. Pentacam® HR images provide you with impressive depictions of IOLs and phakic IOLs. Alterations and injuries to the cornea as well as implants and refractive surgeries are revealed in spectacular manner.

70900 Pentacam® HR incl. standard software
